PROFILE

MSc Computer Animation and Visual Effects student at Bournemouth University NCCA, with production experience as a 3D animation and rigging intern at iDreamSky on Subway Surfers. Focused on character rigging, technical animation, Python tool development, automation, and pipeline efficiency. Currently seeking Technical Artist and Character Rigger graduate or full-time roles in game development.

EXPERIENCE

3D Animation & Rigging Intern | iDreamSky, Shenzhen | Jul 2023 - Nov 2023

- Rigged characters, skateboards, and accessories for Subway Surfers, ensuring natural deformation and smooth motion.
- Created keyframe animation sets including run, jump, and interaction sequences to improve character appeal and player immersion.
- Managed rendering pipeline tasks and sequence-frame output to maintain consistent visual quality for in-game assets.
- Optimized skeletal structures and skin weights to support believable motion for complex decorative props.

EDUCATION

MSc Computer Animation and Visual Effects | Bournemouth University, UK | Sep 2025 - Present

Ranking: Top 3%. Key modules: Animation Software Engineering, CGI Techniques, Pipeline and Technical Direction, Simulation and Rendering, Linear Algebra and Analytic Geometry.

This ScreenSkills-recognized NCCA program combines computer science and artistic production, with training in Python-based tools and plugins, graphics mathematics, simulation algorithms, rendering, and industry VFX pipelines.

BA Animation and Visual Effects | Zhongnan University of Economics and Law, Wuhan | Sep 2020 - Jul 2024

Ranking: Top 10%. Key modules: Lighting and Texturing, Animation VFX, Rigging, 3D Game Modeling, Animation Directing, Concept Design.

The Sino-Korea program with Dongseo University used a 3+1 model covering 3D animation, VR content, VFX, and digital imaging pipelines. The program emphasized interdisciplinary training across art, economics, law, and management, with an international perspective and awareness of cultural IP and project management. Awarded a Bachelor of Arts from Zhongnan University of Economics and Law and a Bachelor of Engineering from Dongseo University.

SKILLS

Core: Character Animation, Rigging, Tool Development

Software: Maya, Unreal Engine, MotionBuilder

Programming: Python

LANGUAGES

Chinese: Native | English: Proficient | Korean: Intermediate
